Do you want to see if you are ready to develop for the Windows Azure platform? Do you have what it takes to create Web applications by using Microsoft ASP.NET, JavaScript, Ajax, and Microsoft Silverlight? What about desktop applications that use Windows Presentation Foundation (WPF) technology? Perhaps you are the services developer using WCF or maybe you are skilled at accessing data with ADO.NET. Getting certified on Visual Studio 2010 helps show your current employer, potential employer and potential clients that you have the skills you need to be successful.

With Microsoft Visual Studio 2010, you can create what you can imagine, build on the strengths of your team, and open up new possibilities. New prototyping, modeling, and visual design tools enable you to create innovative applications for Windows and the Web. And you can take advantage of new opportunities and capabilities offered by multi-core programming and cloud development tools.

**PROGRAM INCLUDES:**  
**Microsoft Certified Training**  
**Microsoft Certified Curriculum**  
**Measure Up Practice Tests**  
**Certification Exam Vouchers**  
**Breakfast & Lunch**  
**Snacks & Refreshments**  
**After hours—lab time**  
**Optional: Hotel. Airfare**

Transform your designs  
into compelling, next  
generation applications.

## Benefits of Accelerated Certification Training

Due to the fast changing IT scenario, companies need to ensure that their employees go through quality training that provides up-to-date knowledge, skills, and practical hands-on experience in a limited time frame. Also, most developers have realized the importance of possessing a professional IT certification; but, it is not always preferable these days to get trained in the orthodox way, because time is a major constraint for both individuals and companies. The less-expensive eLearning or self-study options make a compromise on the hands-on practical aspects of training.

Considering time and budget constraints, one of the most cost effective training solutions available today is Accelerated Training. Our programs are all about teaching specific skills, tools or technologies over a limited time span in a zero-distraction environment; live feedback from instructors about test questions, topics, problem-solving skills, comprehensive certification information and access to the latest systems and servers adds value and measurable accomplishment to the training experience.

## Certifications

### **MCTS: .NET Framework 4, Windows Applications**

Exam 70-511 / Course 10262A: to create Windows-based applications that run on corporate servers or user desktop computers.

### **MCTS: .NET Framework 4, Service Communication Applications**

Exam 70-513 / Course 10263A: to create applications that communicate with servers or other applications in a connected or disconnected state.

### **MCTS: .NET Framework 4, Web Applications**

Exam 70-515 / Courses 10264A & 10267A: to create Web-based applications that run on the ASP.NET platform and are hosted on Internet Information Server.

### **MCTS: .NET Framework 4, Data Access**

Exam 70-516 / Course 10265A: to create data-driven applications that access data from various sources, such as Microsoft SQL Server, Oracle, Microsoft Office Access, object data sources, XML, or other flat-file sources.
